1. Overview

NFT is a great transformation that has completely changed the concept of art and the way people trade works of art.

Current concepts of works of art usually take the form of materials such as canvas or paper that the artist draws a picture on. As a result, preserving and securely stocking work of art has been a problem. Since no matter how hard one tries to keep it safe, someone can break in and steal the work, or copy it and sell it. In the case of famous works, imitations and counterfeiting are abundant and fraudulent transactions are rampant in the market. Moreover, even if the work is well protected from any robbery or imitation, time can be a complete menace to works of art. Deterioration can occur, and the damaged work of art quickly loses its reselling value. Besides, the artist who sold the work only receives payment for the work at the time of the first sale, and even then, if the situation goes wrong, it is often not received.

However, in the case of NFT, artworks are submitted in the form of digital files that are not permanently damaged, and the wallet address and transaction details generated through the block chain are disclosed in the artwork to clarify whether the work is original or not, thereby permanently eliminating counterfeiting disputes. In addition, whenever a work is resold, the resale royalty is paid indefinitely at the rate specified by the original author, making it practically a near-perfect transaction.

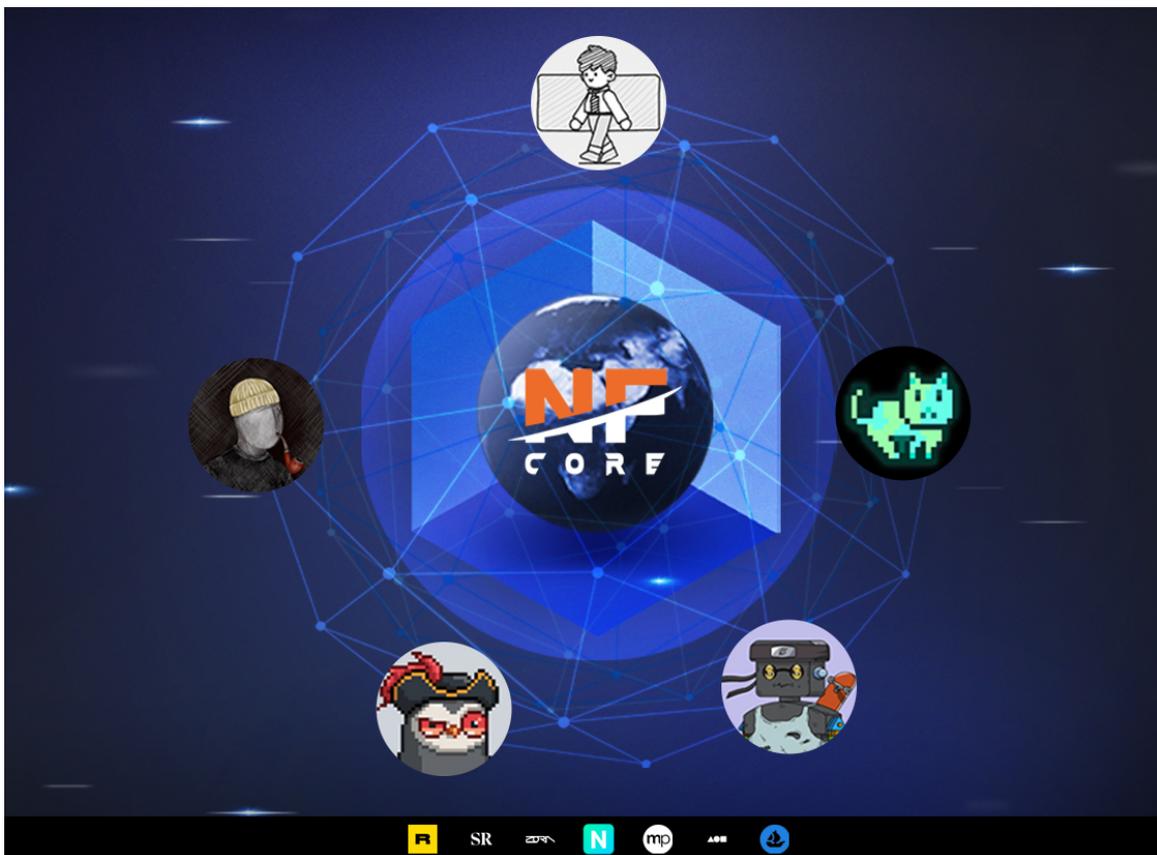

Due to such excellence, the market for NFT works is estimated to reach 230 trillion KRW by 2025, and the variety of NFTs and the price per NFT are also increasing.

(Authorship: Chosun Biz[**Virtual Asset 2022**] LineTech Plus “**NFT market, 230trillion won in 2025...Compete with a popularization strategy**”

As the NFT market continuously grows, there is also a growing demand for a platform that can search NFTs that are currently in the spotlight all over the world, and provides the current NFT market trends in real time, and enables users to purchase NFTs immediately with their own coins. In this way, you can secure in advance NFTs that are likely to be in the spotlight in the market, and because they are available to buy with any coins that you have in your wallet right away, it makes the whole NFT investment experience much easier and fast.

In addition, if such platform provides a service that can generate stable long-term profits just by holding coins without any activity, this can provide unparalleled great value. NFTCore aims at delivering convenience and detailed investment opportunities by providing accurate information on the NFT market, which is currently growing and has an extremely high investment value.

2. NFCore

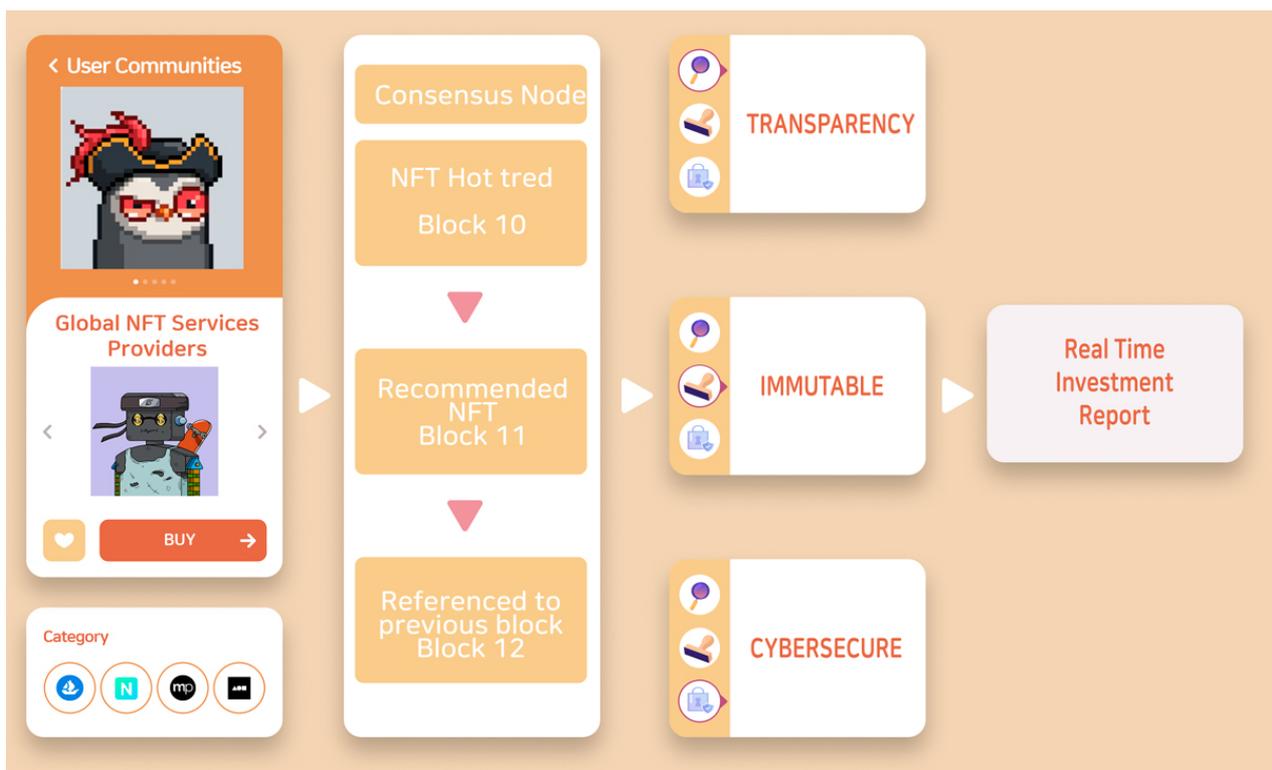

In the global NFT market, all major information is scattered like grains of sand on the beach, NFCore systematically provides only the core and most valuable information to users of NFCore. With this refined information, users can generate highest profit in the short and medium term by investing on NFTs. NFCore is a comprehensive NFT investment portal that helps you in detail about the purchase of NFTs that can generate the highest profit.

NFCore's Hot Item Recommendation feature checks the information of popular works in the market in real time. Precisely, it shows the trends and works of NFTs that are currently the most popular and has high growth potential, and allows you to purchase works immediately with coins you own through the platform. We also plan to implement a staking feature that will allow you to make mid to long-term profits just by owning it without investing in any NFTs.

2-1. NFCore Governance System

In addition to the automatic data collection system, NFCore will also implement a direct voting system for information about NFT hot trends, NFT recommendations, NFTs that are currently attracting the most attention, etc. By using NFCore coins, users and global NFT exchanges can directly participate in NFCore governance system.

In order to achieve our governance system, ERC721 protocol will be introduced to give each participant VP (voting power), and based on this, live information in the market will be reflected in the NFT investment report.

[NFCore governance consensus flow]

2-2. NFCore Hot Item Recommendation

Utilizing APIs, NFCore will provide refined information about price, type, technology base, popularity of NFTs that are currently traded in major global markets in real time. We will also install a feature that will recommend NFTs with the highest profit in the shortest period of time. Since the information of the work will be based on real-time transaction information such as opensea, rarible, superrare, NBA topshot, Mintable, Crypto.com, Axie infinity, you will be provided with the most reliable decision-making data.

2-3. NFCore: Global NFT Trend Prediction

The NFCore platform analyzes not only NFT works that are currently in vogue around the world, but also the current recognition, popularity, price, and community formation status to provide a report that predicts and shows works with short-term price growth in the future. This method is commonly practiced method and similar to predicting a coin with high growth potential in the general coin market and buying it before listing. Through this, we plan to provide a report that can generate large profits when the predicted NFTs or the artist's NFT grows significantly.

3. NFCore Service

3-1. NFCR Coin

NFCR coin is created based on Ethereum's ERC20, which has already proven its safety and high efficiency. By maximizing the characteristics and strengths of the ERC20 coin, such as real-time transactionability, transaction transparency, and interoperability with external blockchains, it will enable real-time reporting of work settlement, staking revenue structure, and global NFT market information.

3-2. NFCore Platform

NFCore will go beyond simple information provision, allowing not only transactions, but also organizations and individuals that compose and operate the global ecosystem of NFTs to directly participate in sharing and promoting their works, and to deliver their trend prediction results in real time.

NFCore is designed in such a way that key groups in the market can voluntarily contribute to its growth by generating coin revenue through this process.

3-3. NFCore Trend Prediction

Accurately predicting short-term trendy elements and NFTs that are actually mentioned in the rapidly changing NFT market is a core competency that has an immediate impact on investment returns.

For example, if you accurately predicted the rise in value of Ethereum right after the launch of Ethereum, and accumulated the corresponding coins in advance, you would have been able to make huge profits. NFCore's trend prediction algorithm will be designed and distributed in a form that will enable this return.

4. NFCore Business Model

4-1. NFCore NFT Advertisement Service

Due to the nature of the NFT market, where anyone can become a creator, the publicity enthusiasm of many aspiring creator is very high. These aspirants will be able to pay advertising fees to promote their profile and works with NPTL coins, and release their works and portfolios to platform members. As a result, coins are purchased through an exchange to make payment, thus increasing not only the recognition of the coin, but also the buying force, leading to an increase in value over time.

4-2. NFCore Creators Support Service

Even for an artist who has raised awareness of his/her work to some extent, submitting his/her work to the most popular platforms and marketplaces at the right time is a key factor that greatly affects the artist's profitability. NFCore provides real-time global NFT marketplace transaction information and trend status to artists who have paid for the service through a real-time API, and based on this, artists are recommended the optimal marketplace for minting their work. We will provide a service that not only benefits buyers, but also provides distinct benefits to creators.

4-3. NPTL Staking

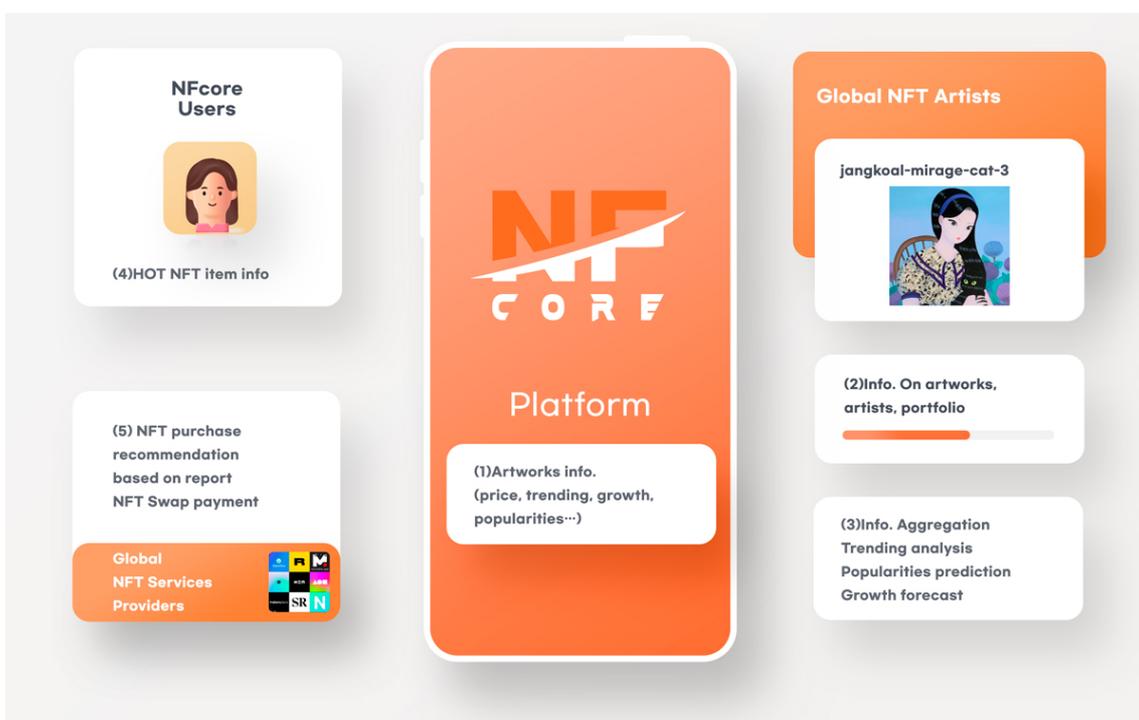

NPTL staking is a function that enables transparent and immediate profits in the mid to long-term without having to invest through NFT promotion, artwork, or purchase. It's a really groundbreaking long-term source of income.

With the staking service, additional coins will be provided proportionally to time and deposit amount just by keeping coins in the wallet without extra effort. This will provide another source of stable income that can generate a long-term stable income.

Lockup Period	Interest Rate(%)	Details
2 month	4%	Staking Interest Rewards Standard The first day of the month, Transferred to users' wallet.
4 month	6%	
6 month	14%	
8 month	19%	
10 month	25%	
12 month	29%	

5. NFCore Token Economy

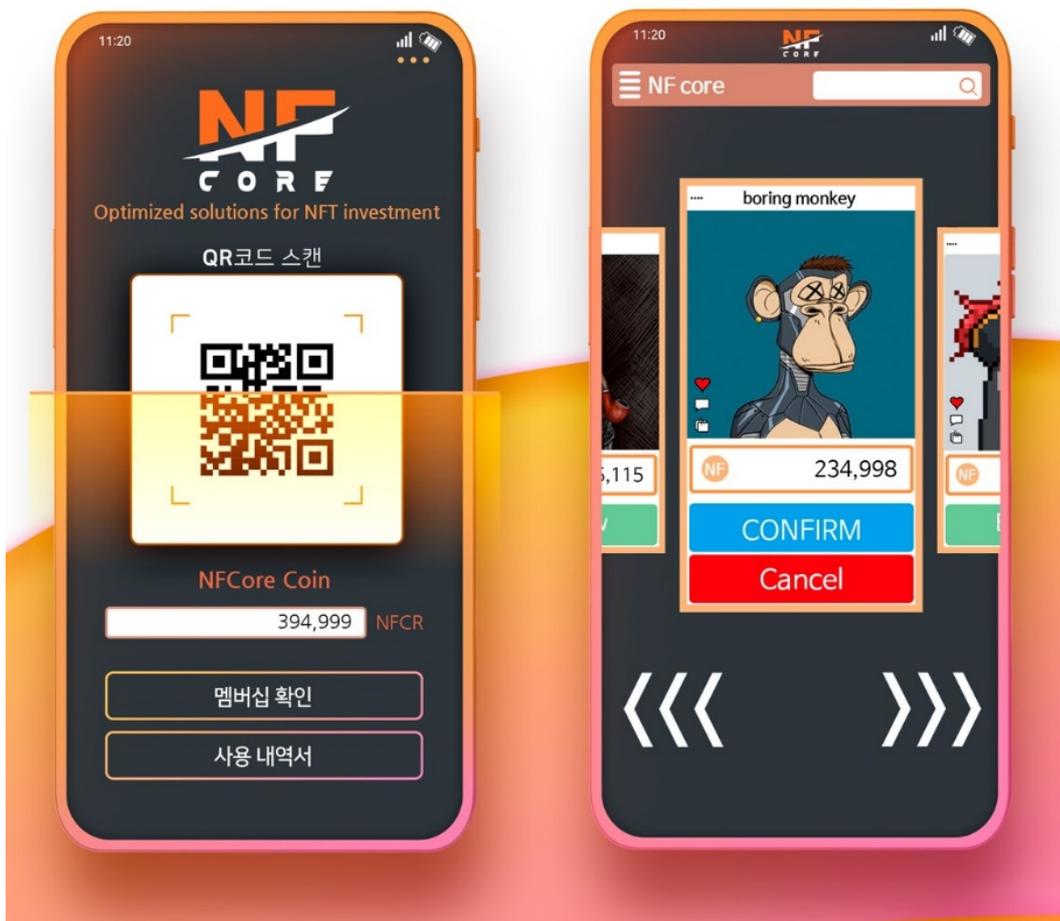

Information collected in real time in each field is organized through an optimized algorithm and then provided to investors. Investors then, will be able to construct an optimal NFT investment portfolio by pre-purchasing the most promising NFTs with a high potential for short-term growth based on optimal information.

[NFCore Consensus process]

5-1. NFCore Wallet

A real-time wallet operated by NFCore allows our users to store their coins in the most secure environment. Additionally, the wallet also connects directly to each important NFT markets so that NFTs can be purchased through the swap payment function. Moreover, through our staking function, you will be able to realize a long-term stable and immediately cashable profits in your hands.
